All the maps available at Peta Malaysia Portal are equipped and suited with the most relevant information to provide the traveller with the most comprehensive and useful information. Each map that you download will include the following:

Accommodation – a list of accommodation are provided for according to the specific location you requested for. This will include budget hotels, resorts, or the standard accommodation choices at that area.

Food outlets – there are also information on food and their outlets which are located around the area. For example, if you request for the map of Cheras, you will find that there is a list of food outlets located in around Cheras including those that are located in within the shopping malls. But if you request for a map of Taman Bukit Anggerik, you will only see the food outlets located there and not those in the shopping malls in Cheras because there are no shopping malls in Taman Bukit Anggerik. This will make the information extremely relevant and useful to you.

Attractions – attractions are also listed in each map that is available on Peta Malaysia Portal. this usually come in form of historical buildings, museums, galleries, shopping malls and such. note that attractions are scoped down from state to district level to help you find the landmarks better.
